The global Edge Welded Metal Bellow market was valued at 402.49 Million USD in 2021 and will grow with a CAGR of 3.67% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Edge Welded Metal Bellows are manufactured by welding a number of individually formed diaphragms to each other. Welded metal bellows are produced with a lower initial tooling cost and maintain higher performance characteristics. The drawback of welded bellows is the reduced metal strength at weld joints, caused by the high temperature of welding. On the basis of product type, Type of Nickel Alloys represent the largest share of the worldwide Edge Welded Metal Bellow market, with 63% share. In the applications, Oil & Gas segment is estimated to be the largest end-use industry segment of the market in 2020, with 32% share of global market. Asia-Pacific holds the major share in the market, with a share of 45%.
