Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Egg replacer products have become prominent in the recent years, due to the outbreak of avian flu in major regions such as North America and Europe. Also, the growth in inclination of consumers toward low fat and low cholesterol food products is fueling the demand for egg replacers, as increase in the prevalence of diseases such as cardiovascular diseases and diabetes has been seen in major Asia-Pacific countries. The application segment of the egg replacers market is estimated to be dominated by bakery & confectionery followed by the sauces, dressings & spreads subsegment in 2017. The sauces, dressings & spreads segment is projected to have the highest growth rate as egg replacers are widely being used in these applications owing to their better emulsification and binding properties.
