Abstracts

The global Elastomeric Foam market was valued at 122.22 Million USD in 2021 and will grow with a CAGR of 5.95% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Elastomeric Foam is characterized by fine closed cell structure thus achieving high moisture resistance and low thermal conductivity. It has high flexibility and elasticity. The main advantage is that the products of this material are self-extinguished, do not support combustion and does not emit dripping particles. No rot, no decay, do not create possibilities for the development of microorganisms. Elastomeric Foam can be mainly divided into NBR Foam, EDPM Foam and Others which NBR Foam captures about 78.30% of Elastomeric Foam market in 2017. According to our research and analysis, manufacturers from Europe are the major leaders in the international market of Elastomeric Foam.
