The global Electric Bicycle Motors market was valued at 8368.18 Million USD in 2021 and will grow with a CAGR of 3.66% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The North America bicycle market is driven by fitness-focused consumers. A large number of people in the North America region are unfit and overweight due to the unhealthy practices in their day-to-day diets. In order to overcome obesity and related health issues, consumers are showing an interest towards exercise and exercise equipment, such as bicycles. The North America region is actively responding to sustainable trends, namely exercise, healthy lifestyle, and sustainable transportation. The fifty most popular cities in the U.S. possess 8,600 miles of bicycle lanes altogether. Associations have become more operational supporters for cycle travelling. Moreover, the International Mountain Bike Association and several other groups are promoting various ways to use cycling as a performance-oriented mode of transport. Urban associations have formed societies and organizations in every zone, such as Transportation Alternatives in the New York City, to stimulate bicycling as a practice of daily exercise and transportation. This is anticipated to boost the demand for electric bicycles in the North American market in the coming years, which will promote the growth of the electric bicycle motors market in the region. Rental and sharing services in big cities in North America is turning out to be a key trend. California and New York are

getting more support from government authorities to use bicycles as an effective mode of transportation. With the increase in rental and the sharing services, the demand for maintenance and replacement services is anticipated to rise in the coming years. This will subsequently increase the demand for electric bicycle motors, which is anticipated to create opportunities for enhancing the growth of the electric bicycle motors market in the coming years.
