The global Electric Fireplaces market was valued at 198.91 Million USD in 2021 and will grow with a CAGR of 5.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Electric Fireplaces is a kind of heating apparatuses used in home and hotel, especially when cold winter. It can support enough heat and you don't worry about fire, it is much safer than the wooden fireplaces. Electric fireplaces work by using metal coils that are heated via electricity. Electric fireplaces are also constructed with an air blower near the coils. As a charge runs through the metal coils, they heat up from the current and a blower inside the fireplaces sends the warm air out. Electric fireplaces are also efficient. They do not waste heat as over 99 percent of the warmth is sent out by the blowers. Due to the efficient distribution of heat, electric fireplaces are also safe to touch. In terms of installation, electric fireplaces are exceptionally cheaper than real fireplaces. Real fireplaces require installation of chimneys, wall mounting and restructuring of the house. Electric fireplaces can stand alone and by themselves with little time spent putting them in place. Electric fireplaces can also have designs which simulate the look and feel of a real fireplace. Market competition is fierce. GLEN DIMPLEX has a big share with 30.73 market share of total market followed by Twin-Star (17%). Other companies are in small scale. In addition, Rui Dressing and Fuerjia not only have their own brands but also provide OEM service for the foreign famous brands. Briefly

speaking, in the next few years, electric fireplaces industry will still be a highly energetic industry. Although sales of electric fireplaces brought a lot of opportunities, we recommend that the new entrants who just have money but without technical advantage and downstream support, do not to enter into the electric fireplaces field hastily.
