## Abstracts

The global Electric Vehicle Motor Controller market was valued at 3739.13 Million USD in 2021 and will grow with a CAGR of 45.97% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The motor controller is mainly composed of heat dissipation module, power semiconductor module, control module, drive module and thin film capacitor, among which the control module includes control chip and power circuit board. The power semiconductor module mainly uses IGBT1 module. As an important signal and energy transmission component in new energy vehicles, the motor controller, on the one hand, receives information from the vehicle controller and control mechanism (brake pedal, accelerator pedal, gear shifting mechanism) to control the work of the motor, and on the other hand, converts the electric energy in the battery into the electric energy that drives the motor. The voltage and current of the driving motor are controlled by the motor controller integrated circuit, and the motor controller can make it work in accordance with the set direction, speed, Angle and response time, so as to control the starting and stopping state, advance and retreat speed, climbing strength and other driving states of the new energy vehicle. According to product types, Electric Vehicle Motor Controller could be basically split into Permanent Magnet Synchronous Motor Controller and Asynchronous Motor Controller. In 2019, Permanent Magnet Synchronous Motor Controller took the dominating position of global market, with a market share of over

81%. In terms of region, China is the largest consumption market of Electric Vehicle Motor Controller, which in 2019 accounted for more than 62% of market share. Following China, Europe and North America occupied about 18% and 13% of global market, respectively.
