Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Electrical insulating varnish are used to ensure electrical devices, including motors, generators, transformers, sensors and other devices that function by electromagnetic induction, have the necessary electrical insulation and structural integrity for operation. Insulating varnishes and impregnating resins are almost always thermosetting resins such as epoxies or phenolics. This material is crosslinking when applied and therefore inherently strong, environmentally stable, impervious and durable. At present, in the foreign industrial developed countries the electrical insulating varnish industry is generally at a more advanced level in developed countries, the world's large enterprises are mainly concentrated in the United States, Switzerland, Japan, Britain, etc. accounted for most of the international market share. Meanwhile, foreign companies have more advanced equipment, strong R&D ability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost is competitive disadvantage, as the Chinese electrical insulating varnish production enterprise technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase.
