The global Electrically Conductive Adhesives market was valued at 178.56 Million USD in 2021 and will grow with a CAGR of 1.72% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Electrically Conductive Adhesives market. An electrically conductive adhesive is a glue that is primarily used for electronics. The electric conductivity is caused by a component that makes ca. 80% of the total mass of an electrically conductive adhesive. This conductive component is suspended in a sticky component that holds the electrically conductive adhesive together. The particles of the conductive component are in contact to each other and in this way make electric current possible. Electrically Conductive Adhesives industry is relatively concentrated, manufacturers are mostly in the North America, which production volume accounted for more than 47.04% of the total production volume of global Electrically Conductive Adhesives in 2016. Henkel is the world leading manufacturer in global Electrically Conductive Adhesives market with the market share of 13.70%, in terms of revenue, followed by H.B. Fuller, DOW Corning, Panacol-Elosol and 3M. Compared to 2015, Electrically Conductive Adhesives market managed to increase revenue by 5.32 percent to 1646.41 million USD worldwide in 2016 from 1563.21 million USD in 2015. Overall, the Electrically Conductive Adhesives market performance is positive, despite the weak economic environment. With the increasing in production capacity, expected that the

Electrically Conductive Adhesives raw material price will be stable in the short term. However, the improvement of energy, transportation costs, and labor costs, will play a significant role in promoting the cost of Electrically Conductive Adhesives.
