Electricity Transmission and Distribution systems consist of many devices used in power transmission and distribution. Such devices include switchgears, transformers, Transmission Tower, Power Cables & Wires and so on. The major equipment of electricity transmission and distribution are Transformers, Switchgears, Transmission Tower, Power Cables & Wires. Complete sets of electricity transmission and distribution equipment suppliers still concentrated in ABB, Siemens, Alstom, Schneider Electronics. Other single device suppliers major include TOSHIBA, GE, Hitachi, Fuji Electric, Mitsubishi Electric, China XD Group, SYOSUNG, TBEA. Despite the slowdown of global economic growth in recent years, the electricity infrastructure investment of each country still keep on stable growth. The growth of transformers will be faster than other key equipment. The transformers used in transmission and distribution industry will grow to 35.2 billion USD in 2020. The switchgears used in transmission and distribution industry will grow to 38.4 billion USD, the Transmission Tower and Power Cables & Wires market will grow to 29.9 billion USD and 42.1 billion USD. According to the electricity infrastructure investment plan of each country, Africa, India and some emerging markets still have great potential for growth in the future. Due to the clear global

recovery trend, investors are still optimistic about this area. Although electricity transmission and distribution industry have a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend to enter this market.
