The global Electron Microscope market was valued at 777.3 Million USD in 2021 and will grow with a CAGR of 6.47% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The electron microscope is a type of microscope that uses a beam of electrons to create an image of the specimen. It is capable of much higher magnifications and has a greater resolving power than a light microscope, allowing it to see much smaller objects in finer detail. They are large, expensive pieces of equipment, generally standing alone in a small, specially designed room and requiring trained personnel to operate them. Key industry players in the global microscopy market are Hitachi High Technologies Corporation (Japan), FEI Co. (USA), JEOL (USA), Carl Zeiss AG (Germany), Tescan (?esk?), Phenom-World (Netherlands), Agilent Technologies (USA), Advantest Corp (Japan), and DeLong Group (USA). The top 3 company are Hitachi High Technologies Corporation, FEI and JEOL, with about 77% market shares. Asia-Pacific region accounted for the largest share of ~ 36% of the global electron microscopy market.
