The global Electronic Grade Sulfuric Acid market was valued at 225.12 Million USD in 2021 and will grow with a CAGR of 3.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Image sensors held the largest share of the electronic sensors market for consumer industry owing to their huge demand in smartphones and digital cameras. However, the market for fingerprint sensors is expected to grow at the highest CAGR between 2017 and 2022 because of their growing adoption in a large number of electronic devices such as smartphones and laptops. These sensors are used to add another layer of security authentication for safe access of these devices. The rising mobile application ecosystem enables adoption of smartphones for ecommerce and financial transaction further makes fingerprint sensor as an essential requirement. Fingerprint sensors are also likely to be commercialized in computer peripherals such as mouse and keypad in the near future. The growing demand for smartphones, smartwatch, emergence of fitness and activity trackers, and growing adoption of augmented reality (AR) based and virtual reality (VR) based headsets are the key factors driving the growth of the electronic sensors market for consumer industry.
