Abstracts

The global Electronic IMU Sensors market was valued at 178.53 Million USD in 2021 and will grow with a CAGR of 4.29% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An inertial measurement unit (IMU) sensor is an electronic device that measures and reports a craft's velocity, orientation, and gravitational forces, using a combination of accelerometers and gyroscopes, sometimes also magnetometers. In this report, the high performance IMU sensors were counted and analyzed. We take into account industrial, aerospace, defense applications (even industrial applications are considered as 'high-performance' applications, as opposed to consumer ones). This refers to the applications: we take into account all the inertial sensors except the consumer / mobile and the automotive applications. In the future, the global consumption of Electronic IMU Sensors will show upward tendency further, consumption is expected in 2020 will be 957.05 (K units). The average operating rate will remain at 89% to 92%. Honeywell, Northrop Grumman, SAFRAN and Thales captured the top four revenue share spots in the Electronic IMU Sensors market in 2015. Honeywell dominated with 34.54 percent revenue share, followed by Northrop Grumman with 19.27 percent revenue share and SAFRAN with 9.25 percent revenue share. Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost

are two major problems. Although sales of Electronic IMU Sensors brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market.
