## Abstracts

The global Electronic Potting & Encapsulating market was valued at 1439.31 Million USD in 2021 and will grow with a CAGR of 11.49% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Electronic Potting and Encapsulation delivers a thicker and more robust solution versus conformal coating to protect electronic assemblies from harsher environments to keep them functioning properly for longer lengths of time, and/or to keep them protected from security threats. Electronic Potting and Encapsulation also create a barrier against moisture, dust, fungus and corrosion. These processes also enhance circuit reliability by eliminating leakage from high voltage circuits. At present, in the foreign industrial developed countries the Electronic Potting & Encapsulating industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the Europe and USA. Meanwhile, foreign companies have more mature equipment, strong R & D capability, and the technical level is also in a leading position. But in foreign companies the manufacturing cost is relatively high, compared with in China. So the manufacturing cost in developed countries is a disadvantage. As the production technology of Electronic Potting & Encapsulating manufacturers in China continues to improve, the share of Chinese manufactures will be increasing, and the competitiveness in the international market will also gradually increase.
