The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Electronic Refrigerant Leak Detector has become a crucial tool for many trade professionals. Basically any equipment that is used in air conditioning or for cooling / freezing contains a refrigerant that has the potential to escape from the coils and joints, so leak testing occurs during production of the equipment, installation (if applicable) and periodic maintenance checks throughout the life of the equipment. For industry structure analysis, the electronic refrigerant leak detectors industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers include Inficon, Robinair, Testo, Bacharach and Elitech Technology, their account for about 70% of the revenue market. Regionally, United States is the biggest production value area of electronic refrigerant leak detectors, also the leader in the whole industry. North America occupied 35% of the production market. It is followed by Europe and China, which respectively account for around 28% and 23% of the global total industry. Other countries have a small amount of production. Geographically, North America is also the largest consumption market in the world, which took about 29% of the global consumption volume.
