## Abstracts

The global Electronics Conformal Coating market was valued at 1886.09 Million USD in 2021 and will grow with a CAGR of 3.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The leading conformal coating materials of the conformal coating material market are acrylic followed by silicone. The leading position of the acrylic conformal coating material can be attributed to the fact that among all the materials it is the easiest to re-work on the acrylic material. Besides this, acrylic material is also easy to apply, has low cost, takes less time to cure, and provides good resistance from chemical, moisture, and abrasion. The growth of this market is being propelled by the increasing usage of electronic components in the end products by OEMs, as well as ability of this coating to help manufacturers to provide end products with higher level of reliability.
