Abstracts

The global Electrostatic Precipitator (ESP) market was valued at 524.7 Million USD in 2021 and will grow with a CAGR of 4.55% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An electrostatic precipitator (ESP) is a filtration device that removes fine particles, like dust and smoke, from a flowing gas using the force of an induced electrostatic charge minimally impeding the flow of gases through the unit. Environment-protection policies emphasize the importance of better air quality and air pollution control, something achievable to a great extent with the use of electrostatic precipitators. The purpose of this industry is higher efficiency numbers, especially in coal-fired power generation. Increased adoption of newer technologies and subsequent renovation by existing power plants bring numerous opportunities for this market in the future. Since demand for coal-fired power plant is going to shrink. In general, Asia is the leader of global electrostatic precipitator market. The reason of it is the addition of a lot of electric utility in China and other emerging countries in this region. And India, where coal-fired generation occupies a majority segment of the overall power generation mix, is also expected a huge demand. Meanwhile, the new market for ESPs is likely to be shrinking in Europe and USA. The downstream industries of electrostatic precipitator are mainly power generation, cement, mining and pulp and paper industry. In recent years, the governments of developed countries enact more and more environment-protection

policy, and the demand for electrostatic precipitator will correspondingly decrease. Although sales of electrostatic precipitator bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the electrostatic precipitator field hastily.
