The global Embedded Fingerprint Module market was valued at 3817.28 Million USD in 2021 and will grow with a CAGR of .69% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The embedded fingerprint module is used to complete fingerprint collection and fingerprint identification. The fingerprint module is mainly composed of a fingerprint collection module, a fingerprint recognition module and an extended function module. From a global perspective, China is the largest manufacturer of embedded fingerprint modules, and major manufacturers are also concentrated in this region. China's 2019 production totaled 651.19 million pieces, accounting for 63.42% of the world, followed by North America. The upstream chip manufacturers of traditional capacitive embedded fingerprint modules are more dispersed. The chip suppliers of optical screen fingerprint recognition solutions are mainly concentrated in mainland China and Taiwan. The chip suppliers of ultrasonic screen fingerprint recognition solutions are mainly in the United States. In the next few years, the embedded fingerprint module market is expected to achieve rapid growth in the Asia-Pacific region.
