## Abstracts

The global Emulsion Adhesives market was valued at 1148.06 Million USD in 2021 and will grow with a CAGR of 3.46% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Acrylic polymer emulsion is projected to be the largest and the fastest-growing resin type segment of the emulsion adhesives market. Acrylic polymer emulsions are environment-friendly adhesives and provide an adequate balance among shear, tack, and peel strength of the bond. Emerging countries such as India, Brazil, Turkey, and Colombia are witnessing a rise in commercial and residential construction activities, which, in turn, is contributing to the growth of the emulsion adhesives market. Emulsion adhesives are manufactured by the emulsification and polymerization of resins, such as PVA, VAE, and acrylic in water. They are generally free of solvents, and hence, are not flammable and non-toxic. These adhesives are mainly used for porous materials, such as paper, cloth, and wood. As emulsion adhesives are free of solvents, they are considered to be environment-friendly. Emulsion adhesives are used in various applications that include furniture, woodworking, decorated plywood, paper working, packaging, composite members, and panels.
