## Abstracts

The global Endoscopy Equipment market was valued at 6883.55 Million USD in 2021 and will grow with a CAGR of 4.86% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

On the basis of product, the global market is segmented into endoscopes, visualization equipment, other endoscopy equipment, and accessories. Endoscopes are expected to account for the largest share of the market in 2017 and this segment is also estimated to grow at the highest CAGR during the forecast period. The dominant market share and growth rate of this segment can be primarily attributed to the rising adoption of minimally invasive procedures, increasing technological advancements, and disposable endoscopes and the subsequent need to repeat the purchase of these single-use products. The growth of this market is majorly driven by factors such as favorable government initiatives, rising number of hospitals and growing hospital investments in endoscopy facilities, technological advancements, and rising prevalence of diseases that require endoscopy.
