Abstracts

The global Engineered Foam market was valued at 6515.02 Million USD in 2021 and will grow with a CAGR of 4.75% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

High transition along with shorter product life cycles in end-use industries is another factor expected to drive the engineered foam market. Increase in the number of developments in the construction, sports & leisure, and automotive industries is also expected to further boost this market. The transportation segment is projected to grow at the highest CAGR during the forecast period. This high growth is attributed to the use of high-power engines with higher calorific value fuels for better combustion. The growth in medical & healthcare segment is attributed to the emerging healthcare sector; and the requirement for precision medical equipment.
