This report studies the Engineered Quartz Stone (EQS) market, East Engineered Quartz Stone (EQS) is made from either a natural slab that has been polished or engineered quartz composite. Quartz is one of the hardest natural materials on earth and has an appearance similar to granite. It is comprised of silicon dioxide. Pure, natural quartz slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab. The East Engineered Quartz Stone (EQS) is used for kitchen and bathroom counters, no matter in personal home or commercial establishments or other industries. Quality Engineered Quartz Stone (EQS) is used for a range of applications such as kitchen countertops, bathroom vanities and counters, and custom solutions for home and commercial interiors. Recently Engineered Quartz Stone (EQS) has acquired increasing significance in various fields of residential Engineered Quartz Stone (EQS) and commercial Engineered Quartz Stone (EQS). Globally, the Engineered Quartz Stone (EQS) market is mainly driven by

growing demand for residential Engineered Quartz Stone (EQS) which accounts for nearly 60.90% of total downstream consumption of Quartz Stone in global.
