The global Epoxy Surface Coating? market was valued at 271.73 Million USD in 2021 and will grow with a CAGR of 5.11% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

There are a variety of applications for epoxy-based materials on the market, including coatings, adhesives and the creation of composite materials. Those used for surface coatings are known for their good mechanical properties, electrical insulating properties, adhesion, and chemical- and heat-resistance. After you prepare and clean a surface, it becomes vulnerable to environmental contamination. When working with steel, for example, it takes as little as 30 minutes for flash rust to form. The longer you wait to apply an epoxy surface coating, the shorter the expected field longevity becomes. For this reason, manufacturers provide specific instructions regarding how quickly to apply the first coating and the ideal environmental conditions. The increasing demand for epoxy surface coating? drives the market. Rapid industrialization is key driver to for epoxy surface coating market, this product is widely applied in many industries such as construction transportation. However, Stringent regulations, fluctuating raw material prices and environmental pollution are expected to be challenges. The epoxy powdered coating has a wide scope of applications such as ceiling panels, display shelving, heaters, household goods, instrument casings, internal vehicle components, sports equipment, tubular steel furniture and wire work. Solvent based coating generally

provides good abrasion and chemical resistance. It has a wide scope of flooring application in chemical fertilizer, petroleum refineries, power plants, sewage, and water treatment plant, paper and pulp mills and warehouse floors.
