The global Excavators market was valued at 2950.51 Million USD in 2021 and will grow with a CAGR of 2.09% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An excavator is a construction vehicle used to dig or move large objects. It is made up of two parts: a driving base and a powerful boom arm with an attachment designed for digging. The operator sits inside a small cab attached to the base and controls the arm. The global excavators market is expected to grow in future due to increasing urbanization, rising construction expenditure, and improving economy. Key trends of this market include high demand in the fuel-efficient excavator, rapid technological advancements, use of IoT in construction, increasing demand from the rental market and rising adoption for other applications. However, there are some factors which can hinder the market growth including stringent emission norms and high maintenance of hydraulic excavators.
