The global Expanded Polypropylene market was valued at 1481.25 Million USD in 2021 and will grow with a CAGR of 7.15% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

EPP is engineered polypropylene resin, formed into small, closed-cell foam beads. Expanded polypropylene (EPP) was developed in the 1980s. This is particle foam based on polypropylene. As opposed to EPS, EPP is not impregnated with a foaming agent, meaning that subsequent foaming agent-based expansion is not possible.
