The global Explosive Trace Detection market was valued at 1165.26 Million USD in 2021 and will grow with a CAGR of 6.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Explosives Trace Detectors (ETD) are explosive discovery hardware ready to distinguish explosives of trace amount. The place that is to be detected is refined by inspecting non-noticeable 'trace' measures of particulates. Gadgets like ETDs are likewise used to recognize narcotics. The hardware is utilized predominantly in airplane terminals, and in places of importance and also in helpless territories considered defenseless to terrorist attacks.
