Abstracts

The global Extruded Snacks market was valued at 2421.37 Million USD in 2021 and will grow with a CAGR of 2.9% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Extruded snacks are products produced by either direct or indirect extrusion. The extrusion technology can produce a wide array of products, and the process is time effective, simple, and offers flexible designing with the product. The potatoes segment is the largest product segment in the extruded snacks market and accounted for around 34% of the total market share. Increasing per capita consumption in the developed regions like Europe and North America is a major driver for the growth of the extruded potato snacks segment. Moreover, the changing taste preferences from various regions has motivated the global vendors to introduce region-specific flavored snacks, which will further spur this segment's growth over the next few years.
