The global Fast Axis Collimator Lenses (FACs) market was valued at 160.88 Million USD in 2021 and will grow with a CAGR of 4.14% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The Fast Axis Collimator Lenses (FACs) industry can be broken down into several segments, NA=0.8, NA=0.7, etc. Across the world, the major players cover LIMO (Focuslight), FISBA, etc. Fast Axis Collimators are compact, high performance aspheric cylindrical lenses designed for beam shaping or laser diode collimation applications. The aspheric cylindrical designs and high numerical apertures allow for uniform collimation of the entire output of a laser diode while maintaining high beam quality. Fast Axis Collimators feature greater than 99% transmission across the designated spectral range, and are available in a variety of focal lengths. The Fast-Axis Collimator lens is the first and most important optical component in the development and production of diode laser systems. For the major players of fast axis collimator lenses (FACs), the LIMO (Focuslight) maintained its first place in the ranking with about 37% of the market share in 2019. In terms of regions, the largest segment of collimator lenses (FACs) would be North America, with a market share of about 41% in 2019. Following North America, Europe accounted for over 26% of global market.
