Fiber-optic connectors are an integral part of a fiber-optic system and are used in applications where optical signals are delivered via fiber. These connectors join the ends of fiber-optic cables and also help them plug into a signal transmitter, receiver, repeater, or splitter. The APAC will account for about 56% of the total market share and will also dominate the fiber optic cable connectors market throughout the forecast period. The increase in internet penetration in developing countries in the region such as China and Japan coupled with the need for high-speed internet connection will drive the demand for cables and connectors. Also, presence of and the demand from various industries such as automotive electronics parts, computer and peripherals, telecommunication, and military and aviation will also propel the demand for fiber cable connectors in the coming years.
