Abstracts

The global Fiber Optic Preform market was valued at 2682.27 Million USD in 2021 and will grow with a CAGR of 5.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report focuses on Fiber Optic Preform market. Fiber Optic Preform is a kind of silica glass rod which has a special refractive index of profile. It is used to produce optical fiber. This report studies the Fiber Optic Preform market, from angles of Company, regions, product types and end industries, to analyze the status and the future. From 2018 to 2019, the growth rate of Fiber Optic Preform slowed down, and major manufacturers further reduced product prices, maintained product coverage, and gradually increased product penetration. Due to the impact of the COVID-19 in 2020, the market experienced negative growth. In China, the high-end Fiber Optic Preform materials mainly rely on import from foreign developed countries, like US, Germany, Japan. To meet the large demand for the high-end products, Chinese manufacturers will invest much more on the R&D, which will certainly weaken the dependence of imports. As large demand for at home and abroad, many companies began to enter the field of high-end. Currently, the Chinese Fiber Optic Preform industry is not only beginning to transit to Fiber Optic Preform products, while still extend in the raw material and downstream industry chain.
