Filament LED Bulb is an incandescent lamp made of LED, which is manufactured according to the form of incandescent lamp, and can directly replace incandescent lamp. The advantages of LED filament lamp are very obvious: 1. Because the package device is full circumferential luminous type, the primary optical loss is small, so the light efficiency of LED filament lamp is high; 2, LED filament lamp filament itself is full circle luminescence, secondary optical light distribution cost is reduced; 3. The LED filament lamp relies on the gas to dissipate heat, so the metal plastic structure is changed to glass; 4, LED filament lamp can use HV circuit structure to achieve simple dimming function. Global Filament LED Bulb key players include Ledvance, Philips, GE, etc. Global top 3 manufacturers hold a share over 41%. China is the largest market, with a share about 36%, followed by North America, and Europe, both have a share about 34 percent. In terms of product, 40W is the largest segment, with a share over 47%.
