Film Thickness Measuring Systems can measure and analysis of single layer and/or multilayer films in less than a second. The optical properties are obtained from reflection and thickness is measured by detecting the sinusoidal fringe pattern from the sample`s specular reflectance. Thin film measurement instrumentation has evolved from complex, difficult to use systems to today`s compact, practical tools that provide a simple but powerful and flexible interface. At the same time, USA is the largest producer of Film Thickness Measuring System, and some international enterprises have opened manufacturing plants in China.
