The global Fire Barrier Sealant market was valued at 55.87 Million USD in 2021 and will grow with a CAGR of 3.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Fire barrier sealants are specific type of sealants that help avert the spread of fire. They prevent the fire from spreading by sealing openings to fire-rated interiors of a building construction, floors, ceilings or wall assemblies. They are possessing fire resistant properties with exceptional longevity, as well as greatly reducing the formulation of smoke and other harmful toxins. They could also additionally act as an acoustic barrier by reducing the transfer of noise. Fire barrier sealants are paintable, and can also be easily cleaned with water. Price in US and EU is much higher than that of China and other developing countries due to their high quality and powerful functionalities. Developing countries such as China and India is more likely to attract more investment opportunity for their potential demand. Fire barrier sealants require no maintenance when installed in accordance with the specifications mentioned by the manufacturer; which, in turn has surged the market demand for them. It is expected that with rising concern for safety and security of lives and property worldwide, the market for fire barrier sealants will grow consistently over the next few years. Besides, manufacturers of fire barrier sealants have been implementing aggressive advertising, pricing, marketing and distribution strategies so as to augment their volume sales and thereby,

increase market penetration. This is expected to boost growth of the fire barrier sealants market in the near future.
