Fire resistant glasses control smoke, fire, and heat, thereby letting safe passage in case of fire. The rise in fire-related accidents has propelled the demand for fire resistant glasses. Lately, it has been observed that the market for passive fire protection has grown significantly. It can be attributed to the low maintenance cost of passive fire protection as compared to active fire protection. Furthermore, the performance and reliability of passive fire protection systems are higher than that of active fire protection systems. Fire resistant glass is one of the passive protection systems and hence, it is witnessing increasing adoption across various sectors. Europe is one of the largest consumers of fire resistant glass, followed by Asia Pacific.
