The global Fire Resistant Hydraulic Fluids market was valued at 1569.37 Million USD in 2021 and will grow with a CAGR of 2.98% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Fire-resistant hydraulic fluids are specially formulated lubricants that are more difficult to ignite and do not propagate a flame from an ignition source. Fire resistant should not be confused with fire proof, as fire resistant fluids will still ignite and burn given specific conditions. Currently, there are many companies in the world can produce fire resistant hydraulic fluids product, mainly concentrating in North America, Europe and Asia. The production of fire resistant hydraulic fluids increased from 247.84 K MT in 2012 to 295.98 K MT in 2017. In consumption market, the growth rate of global consumption is smooth relatively. North America, Europe and China are the main consumption regions. In 2017, the three regions consumed about 76.26% fire resistant hydraulic fluids. As for the applications, among various fields, consumption volume from Metallurgy is the largest. In 2017, Metallurgy industry consumed 123.25 K MT fire resistant hydraulic fluids.
