Abstracts

The global Flavored Milk market was valued at 496.18 Million USD in 2021 and will grow with a CAGR of 3.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Flavored milk is made with milk, sugar, colorings, and artificial or natural flavorings. Flavored milk provides the same essential nine nutrients as plain white milk. The demand for flavored milk is expected to increase during the forecast period mainly due to the fact that flavored milk is increasingly being preferred as a drink to be consumed after workout sessions. In terms of revenue, the long-life flavored milk segment dominated the market. Long-life flavored milk has a shelf life of about six to nine months as they are produced using the ultra-heat treatment (UHT) technique. The main advantage of dairy products produced using the UHT technology is that it can be stored for a longer period without refrigeration.
