The global Flexible Firestop Sealant market was valued at 655.56 Million USD in 2021 and will grow with a CAGR of 7.06% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Flexible firestop sealant are specific type of sealants that help avert the spread of fire. They prevent the fire from spreading by sealing openings to fire-rated interiors of a building construction, floors, ceilings or wall assemblies. They are possessing fire resistant properties with exceptional longevity, as well as greatly reducing the formulation of smoke and other harmful toxins. They could also additionally act as an acoustic barrier by reducing the transfer of noise. Flexible firestop sealant are paintable, and can also be easily cleaned with water. The industry is relatively concentration, the key brand include 3M, Hilti, Rockwool, H. B. Fuller, Bostik (Arkema), Tremco, Everbuild (Sika AG), Specified Technologies, Fosroc (JMH), Pecora, Trafalgar Fire, Promat, Metacaulk (Rectorseal), Entc Nuclear Technology, Bai Yun Chemical, Nelson Firestop (Emerson) and so on. The 3M and Hilti are the leaders. Price in US and EU is much higher than that of China and other developing countries due to their high quality and powerful functionalities. Developing countries such as China and India is more likely to attract more investment opportunity for their potential demand. Flexible firestop sealant require no maintenance when installed in accordance with the specifications mentioned by the manufacturer; which, in turn has surged the market demand for them. It is

expected that with rising concern for safety and security of lives and property worldwide, the market for flexible firestop sealant will grow consistently over the next few years. Besides, manufacturers of flexible firestop sealant have been implementing aggressive advertising, pricing, marketing and distribution strategies so as to augment their volume sales and thereby, increase market penetration. This is expected to boost growth of the flexible firestop sealant market in the near future. Manufacturers of flexible firestop sealant have also been focusing on developing products with additional features, such as enabling these sealants to additionally act as barriers against airborne sound transmission. Ease of application of flexible firestop sealant has also been an important criteria attributing to the growth in their demand. However, a challenge which needs to be addressed by manufacturers of flexible firestop sealant is that many building contractors do not specialize in the installation of flexible firestop sealant, and are not conversant with installation procedures. Hence, direct training and education would be necessary for these contractors, or for distributors and interior systems specialist, who would in turn provide training to wholesale purchasers and building contractors who install flexible firestop sealant.
