The global Flexible Pipes for Oil and Gas market was valued at 4787.05 Million USD in 2021 and will grow with a CAGR of 7.61% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A flexible pipe is made up of several different layers. The main components are leakproof thermoplastic barriers and corrosion-resistant steel wires. The helically wound steel wires give the structure its high-pressure resistance and excellent bending characteristics, thus providing flexibility and superior dynamic behaviour. This modular construction, where the layers are independent but designed to interact with one another, means that each layer can be made fit-for-purpose and independently adjusted to best meet a specific field development requirement. The market for Flexible Pipes for Oil and Gas is concentrated with players such as Technip, GE Oil & Gas (Wellstream), National Oilwell Varco (NKT Flexibles), Shawcor (Flexpipe Systems), Airborne Oil & Gas, SoluForce (Pipelife), H.A.T-FLEX, Polyflow, LLC, Prysmian, Aerosun Corporation, Changchun GaoXiang Special pipe, Contitech AG and so on . Among them, Technip, GE Oil & Gas (Wellstream) and National Oilwell Varco (NKT Flexibles) is the leader. Riser technology is one of the most challenging areas for the offshore industry as it deals with the problems associated with undertaking cutting-edge field developments with increasingly difficult reservoir environments and ultra-deepwater conditions, about 58% of flexible pipes installed are risers.
