The global Flight Management Systems (FMS) market was valued at 2360.54 Million USD in 2021 and will grow with a CAGR of 3.25% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A flight management system (FMS) is a fundamental component of a modern airliner's avionics. An FMS is a specialized computer system that automates a wide variety of in-flight tasks, reducing the workload on the flight crew to the point that modern civilian aircraft no longer carry flight engineers or navigators. The line fit segment dominates the overall market in terms of market size, and is expected to exhibit a similar trend during the next five years owing to the rise in aircraft orders and deliveries worldwide.
