A floating dock, floating pier or floating jetty is a platform or ramp supported by pontoons. It is usually joined to the shore with a gangway. The pier is usually held in place by vertical poles referred to as pilings, which are embedded in the seafloor or by anchored cables. Frequently used in marinas, this type of pier maintains a fixed vertical relationship to watercraft secured to it, independent of tidal, river or lake elevation. For the major players of Floating Dock Systems, Bellingham Marine maintained its first place in the ranking in 2019. The Top 5 players accounted for 40% of the Global floating dock systems revenue market share in 2019. The revenue market for floating dock systems was divided into five geographic regions. North America occupied the largest revenue market share with 41% in 2019, followed by Europe. Other regions have relatively smaller market.
