Fluorescent Pigment are luminescent materials that require no artificially generated energy to reflect colored light and to give off fluorescent light. Fluorescent pigments are composed of dyed organic polymers that are formulated to be solvents for the fluorescence dyestuff. In contrast to ordinary colors, light emitted from a fluorescent color adds to the light returned by simple reflection to give the glow characteristic of fluorescent materials. Major producers in the sector are DayGlo (RPM International), Radiant (RPM International) and UKSEUNG, which accounted for 26.04%, 9.91% and 7.86% of revenue in 2019, respectively.
