The global Fluoropolymer Coating Additives market was valued at 1627.28 Million USD in 2021 and will grow with a CAGR of 6.7% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Fluoropolymer Coating Additives are used in formulation of powder and paint coatings to give protection of substrate from high temperature, chemical reaction and corrosion. They are generally used in industrial applications where the substrates are exposed to harsher environments. The favourable characteristics of fluoropolymer additives make it a preferred solution for applications that require high resistance to solvents, acids and bases and, most importantly, an ability to significantly reduce friction.
