## Abstracts

The global Food Grade Iron Powder market was valued at 4070.26 Million USD in 2021 and will grow with a CAGR of 4.03% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Food Grade Iron Powder is suitable for use as a fortificant (food additive containing any bioavailable iron nutrient or for pigmentation) for different application/purpose. During the process of selection of iron compound as a food fortificant, the overall objective is to find the one that has greater absorbability i.e. the highest relative bioavailability (RBV)\* compared with ferrous sulfate. Wide application of food grade iron powder in different sub-verticals is expected to rise in the forecast period.
