Food processing equipment helps to transform the raw food ingredients into food items through various physical and chemical means. Food processing equipment are available in various categories which includes dryers, chillers, fryers, feeders, mixers, grinders, roasters, homogenizers, separators, slicers and ovens. These food processing equipment are used in various industries including dairy industry, industrial bakery, poultry farm, seafood industry, chocolate manufacturing unit, confectionery, beverage industry, milk, fruit, nut, and vegetable industry. Stainless steel is one of the main elements, which is widely used in the food processing equipment. 304SS and 316SS are two most common types of alloys of stainless steel, which are used in food processing equipment. In the coming years there is an increasing demand for Food Processing Equipment in the regions of North America and Europe that is expected to drive the market for more advanced Food Processing Equipment. Globalization has led to quick changes in the food preferences of people around the world. People have started opting for much protein intake into their diet, consequently leading to increased processed meat consumption. The manufacturers of processed food are majorly focusing on the quality of the products. The food processing equipment market is

showing rapid changes due to two main forces: change in the food demand and improvement in the technologies. Globally, the Food Processing Equipment industry market is not concentrated as the manufacturing technology of Food Processing Equipment is relatively matured. There are large numbers of manufacturers in the world. And some enterprises, like GEA Group, B?hler AG, Marel, etc. are well-known for the wonderful performance of their Food Processing Equipment and related services. At the same time, North America, occupied 27.99% revenue market share in 2016, is remarkable in the global Food Processing Equipment industry because of their market share and technology status of Food Processing Equipment. Although the market competition of Food Processing Equipment is fierce globally, there are many enterprises can obtain considerable profit form the manufacturing and marketing of Food Processing Equipment and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.
