### Abstracts

The global Fused Silica market was valued at 4.75 Million USD in 2021 and will grow with a CAGR of 5.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Fused Silica is a noncrystalline (glass) form of silicon dioxide (quartz, sand). It lacks long range order in its atomic structure. Its highly cross linked three dimensional structure gives rise to its high use temperature and low thermal expansion coefficient. China has the largest global export quantity and manufacturers in Fused Silica market, while the North America is the second sales volume market for Fused Silica in 2017. Moreover, China's production is mainly concentrated in Lianyungang, Jiangsu. In the industry, Lianyungang Taosheng Fused Quartz profits most in 2017 and recent years, while Heraeus and Lianyungang Haoyu quartz ranked 2 and 3. The market share of them is 12.77%, 12.43% and 6.24% in 2017. The gap of market share is kept on enlarged due to different strategy. Fused Silica technology is much mature now, and new enterprises can not surpass existing famous brands on reputation or design in the short term. So, the study group recommends the new entrants need to be considered carefully before enter into this field.
