The global G-Protein Coupled Receptor (GPCR) Targeting market was valued at 71.9 Million USD in 2021 and will grow with a CAGR of 2.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

G protein-coupled receptors (GPCRs) which are also known as seven-transmembrane domain receptors, 7TM receptors, heptahelical receptors, serpentine receptor, and G protein-linked receptors (GPLR), constitute a large protein family of receptors that detect molecules outside the cell and activate internal signal transduction pathways and, ultimately, cellular responses. Coupling with G proteins, they are called seven-transmembrane receptors because they pass through the cell membrane seven times. In the next five years, the CAGR of GPCR Tools is about 3.6%, and the revenue in the 2022 is about 1760 M USD. GPCRs market comprises assays and kits that aid in drug discovery and development. GPCRs is a large family of cell surface receptors that respond to a diverse range of external stimulus and play a major role in modern pharmacology due to their significant function in cell communication. More than 40% of the drugs available in the global market target GPCRs and most of the drugs that are currently under clinical and preclinical studies target this highly studied receptor protein. The classification of GPCR Tools includes GPCR Consumables and GPCR Equipment, and the proportion of GPCR Consumables in 2016 is about 70% and the proportion is increasing trend from 2012 to 2016. In terms of therapeutic areas, the market has been

segmented into: Oncology, cardiovascular system, central nervous system (CNS), etc. Oncology was the largest segment of the global GPCRs market in 2016 and the proportion in 2016 is 50%. North America is the largest consumption place, with a consumption market share nearly 49% in 2016. Following North America, Europe is the second largest consumption place with the consumption market share of 30.4%. Market competition is intense. Thermo Fisher Scientific, PerkinElmer, Merck, BD, etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; with the development of society and the changing of consumer demand, there will be more companies enter this industry.
