Galvanized steel is simply coated by zinc. Galvanizing is a very important production process used for steel protection against corrosion. Galvanized steel includes hot-dip galvanizing and electrical galvanizing, and hot-dip galvanizing is the most commonly used method. It is widely used in construction industry, automotive industry, and home appliances industry. Galvanized steel downstream is wide; the major fields are construction, automobile, home appliances, etc. In recent years, automobile industry has developed rapidly. Increasing demand for automobile is expected to drive the demand for the galvanized steel market. China, USA and Japan are the main production regions for galvanized steel, as the demand for galvanized steels is high in these areas. China market is increasing with the rapid development of downstream industry.
