The global Garage Door Opener market was valued at 1181.35 Million USD in 2021 and will grow with a CAGR of 1.86% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A garage door opener is a motorized device that opens and closes garage doors. Most are controlled by switches on the garage wall, as well as by remote controls carried by the owner. The global Garage Door Opener industry is characterized by several large international manufactures and many smaller regional and local manufactures.

Therefore, market share concentration is low. The two largest operators account for about 31.02% of total industry revenue in 2015, most manufactures operate locally and provide services to a small segment of the population. Nonetheless, market share has increased over the past five years because a number of companies were acquired during the recession. Larger companies are looking to expand their footprint in nearby areas, where they can add value and turn once-struggling operations into profitable ventures. Key market players include Chamberlain Group, Overhead Door, SOMMER Group, LiftLogix, Teckentrup, Marantec, Skylink, H?rmann, CAME, and Dalian Seaside among others.
