A gearless elevator is one in which the power of the motor is transferred directly to the traction wheel without passing through the gearbox. Gearless tractor is a low speed high torque motor powered by AC or DC. In this case, the drive pulley is connected directly to the end of the motor. A gearless traction elevator can reach speeds of 20 meters per second. Install brakes between the motor and the gearbox or between the motor and the drive pulley or at the end of the drive pulley to hold the elevator to a floor.
