The global Gel Permeation Chromatography (GPC) market was valued at 12.36 Million USD in 2021 and will grow with a CAGR of 2.64% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Gel permeation chromatography (GPC) is one of the most powerful and versatile analytical techniques available for understanding and predicting polymer performance. It is the most convenient technique for characterizing the complete molecular weight distribution of a polymer. Less sophisticated GPC systems, typically referred to as 'clean-up' systems, are used more as a sample preparation technique on complex samples. First, for industry structure analysis, the Gel Permeation Chromatography (GPC) industry is concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for 67.94 % of the revenue market. Regionally, Asia-Pacific is the biggest revenue area, also the leader in the whole Gel Permeation Chromatography (GPC) industry. Second, the sales of Gel Permeation Chromatography (GPC) increased from 2219 units in 2012 to 2546 units in 2016 with an average growth rate of 3.73%. Third, Asia-Pacific occupied 41.59% of the sales market in 2016. It is followed by Europe and North America, which respectively account for around 28.52% and 22.55% of the global total industry. Other countries have a smaller amount of sales.
