The global Geogrids market was valued at 2.86 Million USD in 2021 and will grow with a CAGR of 4.25% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A geogrid is geosynthetic material used to reinforce soils and similar materials. It is a two-dimensional grid or a certain degree of three-dimensional grid which is molded by the polypropylene, PVC and other thermoplastic polymer. Geogrids industry concentration is not high. There are more than one hundreds manufacturers in the world, and high-end products mainly from Germany, America, Italy, Taiwan and China manufacturers. In China, the manufactures focus in Shandong province. Feicheng Lianyi and Shandong New Slightly Geotechnical Material are two big manufacturers. Also there are many small companies distributed in southeast, southwest and central regions of China. All of the manufactures in the world are committed to the improvement of product. These two years, some of Chinese manufactures can almost catch up with the world`s leading technology too. Currently, America geogrids patent amounts are largest. While due to the industrial upgrading and technology transfer, number of patent applications in America tends to decrease. South Korea is the second largest country about the patent amounts of geogrids.
